Experience. Rejuvenation. Service:
Vancouver Laser Skin Care Clinic
in Downtown Camas

COVER STORY

“We help restore confidence...”

With over 30 years of aesthetic laser and skin care experience and expertise, Master Aesthetician, Lori Keller, knows that looking and feeling confident play a big part in our well being.

“If you like how you look, you feel more positive and content in your daily life,” says Keller. “But environmental factors such as sun exposure, and physiological factors such as genetics and aging, all can play a role in changing your outward appearance. We help restore confidence by repairing some of the damage our environment and aging can cause.”

When Vancouver Laser Skin Care Clinic (VLSCC) decided to move its offices to Downtown Camas, they brought more than 30 years of aesthetic laser and skin care experience and an array of treatments and products that rejuvenate skin and restore your youthful glow. They feel good when you look great.

Their new office at 715 NE 5th Avenue is charming, and peaceful, and is part of the history and future of Camas, a quaint and successful town that many say is a city about wellness.

“We love being part of this wonderful and historic downtown scene,” said Keller, who owns VLSCC. “And, we invite you to come see what we’re all about. -- from pre-teen/adult acne sufferers to mature patients.”

Vancouver Laser Skin Care Clinic offers many services, including: IPL, Chemical Peels, Microneedling, Ultherapy, Face and Leg Vein Removal, Botox, and more!

IPL

IPL-Intense Pulse Light Laser is a safe and effective light treatment that will rejuvenate and renew the skin for a more youthful appearance. IPL is an effective treatment for uneven skin tone, brown spots, Rosacea, fine lines, broken capillaries and redness.

Chemical Peel Treatment

VI Chemical Peel® is a safe, effective approach to achieving younger looking skin and provides superior results. Two to four VI Peels per year, along with proper home care, reverses sun damage, treats hyperpigmentation, melasma, acne and acne scarring, aging

skin and rosacea. Patients of all ages will benefit from their treatments, from pre-teen acne sufferers to mature patients wanting to reverse the signs of aging. The peels are suitable for the face and body.

Microneedling

Micro-needling is a therapy in which a device delivers tiny needle pricks to stimulate the skin's natural healing processes—it can minimize wrinkles and improve the appearance of scars in all skin types and with minimal recovery. The technique works great for sunken areas on the skin caused by acne. It can also help smooth small thin wrinkles, such as those around the eyes, and on upper lip wrinkles.

Ultherapy®

Ultherapy® is a non-invasive, non-surgical procedure that utilizes the power of focused ultrasound technology, and sound waves to stimulate collagen to lift, tone and tighten the skin. The Ultherapy procedure can be performed on the eyes, brow, face, neck and under the chin and chest. This technology stimulates the production of collagen resulting in continuous improvement of the tone and tightness. An Ultherapy procedure can take anywhere from 30 minutes to 2 hours depending on the area treated. Ultherapy delivers outstanding results without surgery or downtime.

Face and Leg Vein Treatment

Their state-of-the-art laser treats a broad range of vessels from tiny spider veins to deep blue reticular veins quickly, safely and effectively. Clients with dark, light or tanned skin can experience outstanding results with minimal bruising. Blood blisters and cherry angiomas also respond very well to their treatment program, usually with just one treatment.

Botox®

Botox® Cosmetic (onabotulinumtoxin) is a prescription medicine that is injected into muscles and used to temporarily improve the look of both moderate to severe crow's feet lines and frown lines between the eyebrows in adults.

Please call for a complimentary consultation to see how VLSCC can help you. **360.823.0795.**
